

CLAY PAVERS

ENDICOTT™

This page intentionally left blank.

**SETTING THE SOLID WORLD
IN MOTION.**

Endicott clay pavers are the number one choice of designers who appreciate their aesthetic beauty, color retention and low maintenance requirements. They're fired at temperatures exceeding 2,000 degrees Fahrenheit, rendering them colorfast (non-fading) and resilient to wear and staining.

Unlike concrete pavers, Endicott's clay pavers do not require sealing. Due to their incredible durability, they last for decades and possess a sustainable natural color that looks great throughout their life.

PAVER COLORS

Rose Blend

Red Blend

Burgundy Blend

Bordeaux Blend

Coppertone

Copper Canyon

Medium Ironspot #77

Medium Ironspot #46

Dark Ironspot

Manganese Ironspot

Texture is wirecut for pavers and paver treads and smooth for pool coping.

Double Bullnose

Paver Tread

Pool Coping

PAVER SPACERS

Paver Spacers used in a Herringbone application

Paver Spacers used in a Running Bond application

Paver Spacers used in a Basketweave application

ELIMINATING CHIPPAGE

In segmental paving applications, chippage often occurs when pavers move against each other due to improper installation techniques. Endicott paver spacers, however, eliminate this issue. They create and ensure the needed spacing between units to accommodate jointing sand while providing the crisp appearance of square edge pavers.

ESTIMATING DATA

Herringbone Pattern

10 'T' Spacers/sq. ft.

Running Bond Pattern

10 'T' Spacers/sq. ft.

Basketweave Pattern

7.5 'T' Spacers/sq. ft.

1.5 '+' Spacers/sq. ft.

NOTE:

Above sq. ft. quantities include perimeter spacers.

Paver Spacer—Cross

Paver Spacer—Tee

Location: Castle Rock, CO

In 1920, rich mineral deposits were discovered in Jefferson County, Nebraska. These rich minerals help give Endicott clay pavers their unmatched color and resiliency. Across North America, Endicott's collection of face brick, thin brick, pavers, tile and special shapes are setting the solid world in motion.
